2011 Saskatchewan Crop District Crop Production

Area, yield, and production information is available by Crop District for the following crops: winter wheat, spring wheat, durum, all wheat, oats, barley, all rye, flaxseed, canola, peas, chickpeas, lentils, mustard, and canary seed. Also available is summerfallow area by Crop District, total seeded area and total production by Crop District and 10-year average seeded area and production by Crop District.

- Total 2011 crop production of the listed crops was 25.9 million tonnes, up 8.7 per cent from the 2001-10 average.
- Total 2011 seeded area of the listed crops was 29.7 million acres, down 9.7 per cent from the 2001-10 average.
- Half of the crop districts had seeded area below the 10-year average, mostly in the eastern half of the province, the area most affected by flooding. The other half were above the 10-year average for seeded area.
- Only seven crop districts had lower than average production, again mostly in the eastern half of the province.
